MEMORANDUM FOR: Director of Communications

FROM:

[Redacted]

25X1

Chief, Management & Liaison Staff, OC

SUBJECT:

New Headquarters Building Communications Support

1. The attached issue memorandum outlines the current situations and issues involved in providing new communications to the headquarters complex and recommends early and vigorous initiation of project activity.

2. The recommendations involve establishment of a project team and assignment of personnel immediately. They also call for establishment of relationships with major users quickly so that data communications requirements can be attacked cooperatively rather than piecemeal.

3. If the building is delayed then the pace of the work can be adjusted accordingly. A small team is envisioned at once, growing to full strength in 1985-86. The requirements analysis and architecture development in the next six to nine months requires dedicated support in any event.

4. I endorse these recommendations, noting that full-time assignments are required, and suggest that the division chiefs be given direction to implement them.
